

USTDA

UNITED STATES TRADE AND DEVELOPMENT AGENCY PRESENTS

Business Briefing highlighting opportunities for U.S. companies in Ukraine's Power Generation Sector Tuesday, December 11, 2012 | 1:30 p.m. – 4:30 p.m. PowerGen 2012 Conference | Orlando, FL

Meet the Delegates

U.S. companies will have the opportunity to meet and network with key decision makers responsible for modernization of power plants in Ukraine, including officials from DTEK, Centrenergo, Severodonetsk TPS, and Soyuz Corporation. DTEK, the leading private sector Ukrainian power generation and distribution company, estimates that it will be investing up to \$20 billion in power generation equipment, technology and services over the next 15 years. This investment by DTEK represents a significant opportunity for U.S. manufacturers of steam turbines, boilers, instrumentation and controls, and air pollution control equipment.

Export Opportunities

This USTDA Ukraine Power Generation Sector Business Briefing provides a valuable market entry opportunity for U.S. companies to gain access to Ukraine's power generation sector, particularly in power generation and air pollution control technologies.

Other Project Highlights

- Over the next 15 years, Ukraine will spend over \$20 Billion on power plant modernization.
- This visit of Ukrainian officials is designed to introduce U.S. best practices and advanced technologies to key Ukrainian decision makers and buyers.

The National Export Initiative was launched in 2010 in order to create jobs for Americans by doubling U.S. exports in five years and opening new markets for U.S. firms. USTDA supports the NEI's mission as a member of the President's Export Promotion Cabinet.
