United States and China Launch Public Private Partnership on Healthcare

Increasing collaboration in the healthcare sector

Washington, D.C.-- Today, on the occasion of the State Visit of President Hu Jintao to the United States, the U.S. Trade and Development Agency (USTDA) and the U.S. Department of Health and Human Services (HHS) and the U.S. Department of Commerce (Commerce) joined with China's Ministries of Health (MoH) and Commerce (MOFCOM) to announce their support for the establishment a new public-private partnership in the healthcare sector.

Initially, twelve U.S. companies and six supporting organizations will participate in this partnership, alongside the supporting U.S. and Chinese Government agencies. The partnership will be organized around U.S. healthcare industry strengths and government capabilities in order to foster long-term cooperation with China in the areas of research, training, regulation and the adoption of an environment that will increase accessibility to healthcare services in China. Participating U.S. companies initially include 3M, Abbott, Chindex, Cisco, General Electric, IBM, Intel, Johnson & Johnson, Medtronic, Microsoft, Motorola, and Pfizer. Supporting organizations include AdvaMed, the Alliance for Healthcare Competitiveness, the American Chamber of Commerce in China, the American Chamber of Commerce in Shanghai, PhRMA and the U.S.-China Business Council.

"The economic and social development of any nation depends on the health and productivity of its people," said HHS Secretary Kathleen Sebelius. "This partnership builds on a strong foundation of bilateral cooperation in this critical sector of our economies."

USTDA Director Leocadia Zak stated, "This public-private partnership provides China an important private sector resource to draw from to help with key development issues, while also identifying for U.S. companies projects that have been designated priority development projects by China."

Through programs supported by the initiative, Chinese participants will gain greater access to U.S. private sector expertise and ingenuity and better awareness of new technologies and results-oriented regulatory processes. Initially, these goals will be advanced through a USTDA-funded *Healthcare Professional Personnel Exchange Program* that will include a series of visits by Chinese healthcare officials to the United States to share best practices and witness new and innovative technologies that will be important to long-term healthcare delivery.

"The partnership will draw its strength from U.S. companies strategically working together to help China achieve its development goals that will open new export markets for U.S. goods and services," noted Commerce Secretary Gary Locke.

Over time, the partnership will enhance cooperation in areas such as rural healthcare, emergency response, personnel training, medical information technology, and management systems; while also exploring ways to support other fields such as integrative and traditional Chinese medicine. These

programs will enhance both sides' knowledge of best practices, management, technological developments, and other healthcare-related topics.

####

The [U.S. Trade and Development Agency](#) helps companies create U.S. jobs through the export of U.S. goods and services for priority development projects in emerging economies. USTDA links U.S. businesses to export opportunities by funding project planning activities, pilot projects, and reverse trade missions while creating sustainable infrastructure and economic growth in partner countries.

The [U.S. Department of Health and Human Services](#) (HHS) is the United States government's principal agency for protecting the health of all Americans and providing essential human services, especially for those who are least able to help themselves.

The [U.S. Department of Commerce](#) has a broad mandate to advance economic growth and jobs and opportunities for the American people. It has cross-cutting responsibilities in the areas of trade, technology, entrepreneurship, economic development, environmental stewardship and statistical research and analysis. The Department also leads the President's National Export Initiative, which aims to double U.S. exports by 2015 in support of several million American jobs.
