

U.S. Trade and Development Agency

Success in Thailand

The U.S. Trade and Development Agency (USTDA) helps companies create U.S. jobs through the export of U.S. goods and services for priority development projects in emerging economies. USTDA links U.S. businesses to export opportunities by funding project planning activities, pilot projects, and reverse trade missions while creating sustainable infrastructure and economic growth in partner countries.

Clean Energy, Clear Benefits in Thailand

In recent years, USTDA has helped Thailand's state-owned oil and gas company, PTT, identify the optimum design and specifications for the country's first liquefied natural gas (LNG) receiving terminal at Map Ta Phut. This terminal is needed to meet Thailand's growing requirements for clean gas fuels and to avoid additional coal-based power generation. As a result of a USTDA-funded feasibility study conducted by Pace Global Energy, full project implementation is now underway on this \$1 billion project. To date, at least 22 U.S. companies from 13 states have entered into contracts to provide services and technologies critical to the success of the terminal.
