

# AFRICA FAST POWER REVERSE TRADE MISSION

**BUSINESS BRIEFING • NOVEMBER 3, 2017 • HOUSTON, TEXAS**

**T**he U.S. Trade and Development Agency is hosting the **Africa Fast Power Reverse Trade Mission (RTM)**. The event will bring senior energy representatives from Angola, Benin, Cameroon and Mozambique, to the United States to introduce them to cutting-edge U.S. technologies and equipment in fast and mobile gas turbine power for both emergency and distributed generation applications.

As part of the visit, USTDA will host a one-day Business Briefing for U.S. industry to learn about energy project opportunities in the countries represented by the delegation. Delegates will present on their equipment needs, upcoming projects, and procurements related to the development of their national fast power generation programs. U.S. companies will have the opportunity to meet one-on-one with the delegates to share information on products and services that can advance the energy goals of these countries.

## Attend the Business Briefing to:

- Learn about upcoming fast power and other energy project opportunities in Sub-Saharan Africa
- Understand the needs and challenges of providing power generation to remote locations
- Meet one-on-one with key decision-makers

## Topics of Discussion Will Feature:

- An overview of the four African nations' fast power infrastructure and networks
- The regulatory environments
- New potential export opportunities

## Delegates Represent:

- Angola
- Benin
- Cameroon
- Mozambique

## Background

Popularized in the United States in support of the shale oil boom, fast power technology providers are now setting their sights on African markets. The rapid deployment and flexible, modular nature of these technologies are particularly relevant in the African context, both for emergency power applications and for development and expansion of longer-term generation projects. Additionally, fast power technologies typically have inherent financing advantages over traditional fixed generation, reducing the need for credit enhancements.
