U.S. Trade and Development Agency

1000 Wilson Boulevard, Suite 1600 | Arlington, VA 22209

### MEET WITH CHINESE DECISION-MAKERS

Delegates from State Grid Corporation of China (SGCC) will brief U.S. companies on their live wire maintenance and repair plans and goals in China.

The delegation is in the United States to participate in the China Live Power Line Maintenance and Training Program hosted by the U.S. Trade & Development Agency. The delegation will receive training and learn more about U.S. equipment and best practices used in live wire maintenance and repair of power lines.

### OPPORTUNITIES FOR U.S. COMPANIES

To date, SGCC has not deployed a widespread live line maintenance program and plans to implement one in nine major cities: Beijing, Shanghai, Tianjin, Nanjing, Suzhou, Hangzhou, Ningbo, Qingdao, and Xiamen. The equipment featured during the program will allow SGCC to improve operational efficiency and electrical line worker protection.

If China adopts live line maintenance and repair regulations similar to the U.S., it will lead to more stringent safety measures and a demand for high quality products, creating opportunities for U.S. companies.
